## სამეცნიერო ნაშრომების სია

1. Janelidze R, Blagidze Yu, Mshvelidze G, Gogolin O, **Tsitsishvili E**, “**Mixed mobile ion effect in borosilicate glasses doped with  $A_2 B_6$  and  $A_1 B_7$  semiconductor compound components**”. In: “*Borosilicate Glass: Structure, Properties and Applications*”, Nova Science Publishers, Inc. Hauppauge, New York, 2019
2. **Tsitsishvili.E**, “**Impact of heavy hole-light-hole coupling on the exciton fine structure in quantum dots**”, *Physica E*, 161, 2017
3. Janelidze.R, **Tsitsishvili.E**, “**Exciton fine structure in low symmetry quantum dots**” *Proc. of the Georgian National Academy of Sciences, Chemical Series*, v.43, N1, 47, 2017
4. Janelidze.R, Blagidze.Yu, Mshvelidze,Papunashvili.N, Gogolin.O and **Tsitsishvili.E**, “**Electrical conductance of ZnO nanopowder pellets**”, *Proc. of the Georgian National Academy of Sciences, Chemical Series*, v.42, N1, 40, 2016.
5. **Tsitsishvili.E**, “**[Light-hole exciton spin relaxation in quantum dots](#)**”, *Phys. Rev. B* 91, 155434 (2015)
6. **Tsitsishvili.E**, “**Spin relaxation within light-hole exciton in quantum dots**”, *Transactions of P.Melikishvili Institute of Physical and Organic Chemistry* ,176, 2015
7. Janelidze.R, Blagidze.Yu, Mshvelidze.G, Gogolin.O and **Tsitsishvili.E**, “**[Mixed mobile ion effect in borosilicate glasses doped with cadmium sulfoselenide and silver and copper iodides](#)**”, *Solid State Ionics*, Volume 260, 90, 2014
8. **Tsitsishvili.E**, Kalt.H, “**Polarization dynamics in quantum dots: the role of dark excitons**”, *arXiv:1402.4913v1[cond-mat.mes-hall]* 20 Feb. 2014
9. **Tsitsishvili.E**,” Comment to article “**A light-hole excitons in a quantum dot**” by Y.H.Huo et al, *Nature Physics* **10**, 46 2014, *arXiv:1405.6795v1[cond-mat.mes-hall]* 27 May 2014
10. Janelidze.R, Blagidze.Yu, Mshvelidze.G, Gogolin.O, Katsiashvili.M, **Tsitsishvili.E**. “**Optical spectra and electrical conductivity of CdTe- and AgBr-doped borosilicate glasses**”, *Proc.of Georg. Ac.Sc. Chem. Ser.* 2012
11. Janelidze. R, Bakradze O, Gogolin O, **Tsitsishvili E**, Klingshirn C. “**AC conductivity of CdSSe-doped borosilicate glasses**”. *Chalcogenide Letters*, v,7, 559, 2010
12. **Tsitsishvili.E.**, Kalt H. “**Exciton spin relaxation in strongly confining semiconductor quantum dots**”, *Physical Review B*, v.82, 195315, 2010

13. **Tsitsishvili E, Kalt H. “Spin-conserving scattering of holes by magnetic ions in semimagnetic quantum wells”.** *Physical Review B*, v.77, 155305, 2008
14. **Tsitsishvili E, Kalt. “Exciton states and spin relaxation in CdSe/ZnSe self-organized quantum dots”.** *Semicond. Sci. Technol.* v. 23, 114010, (2008)
15. **Klochikhin A, Reznitsky, Permogorov S, Tsitsishvili E, Baltz R, Kalt, H, Klingshirn C. “Effect of multiphonon processes on the spin relaxation of exciton localized in semiconductor quantum dots”.** *Phys. Solid State*, v.56, 2367, (2008)
16. **Janelidze.R, Blagidze.Yu, Mshvelidze.G, Gogolin.O, Tsitsishvili.E, Bakradze O, „Optical, relaxation and transport processes in semiconductor nanostructurs“,** *Grant #GNSF/ST06/4080, Final report,*
17. **Glazov M, Ivchenko E, v.Baltz R, Tsitsishvili E. “Fine structure of excited excitonic states in quantum disks”.** *International Journal of Nanoscience*, v.6, 265, (2007)
18. **.A.N.Reznitsky, A.A.Klochikhin., S.A.Permogorov1, L.N.Tenishev, E.Tsitsishvili, R.v.Baltz, H.Kalt, C.F.Klingshirn, “Temperature dependence of exciton spin relaxation rates in semiconductor quantum dots” ,** *AIP Conf. Proc.* 893, 1321, 2007
19. **Tsitsishvili E, v. Baltz R, Kalt H. “Exciton-spin relaxation in weakly confining quantum dots due to spin-orbit interaction”.** *Phys. Status Solidi (b)*, v.243, 2274, (2006)
20. **Tsitsishvili E, Kalt. “Magnetic field effects on the spin relaxation in semimagnetic quantum wells”.** *Physical ReviewB*, v.73, 195402, (2006)
21. **Loeffler W, Troendle D, Fallert J, Tsitsishvili E, Kalt H, Litvinov D, Lupaca- Schomberg J. Electrical spin injection into InGaAs quantum dots.** *Intelnational Conference on nonlinear optics, (NOEKS 3), Muenster, Germany,23-26 February, 2006.*
22. **Tsitsishvili E, v. Baltz R, Kalt H. Spin-flip relaxation in quantum dots due to spin-orbit interation.** *Physical Review B*, v.72, 155333,2005.
23. **Tsitsishvili E, v. Baltz R, Kalt H. Phonon-induced exciton spin relaxation in semimagnetic quantum wells.** *Physical Review B*, v.71, 155320, 2005.
24. **Glazov M, Ivchenko E, v.Baltz R, Tsitsishvili E. Fine structure of excited excitonic states in quantum disks.** *International Journal of Nanoscience*, June 2005.
25. **Tsitsishvili E, v.Baltz R, Kalt H. Exciton spin-flip processes in single quantum dots.** *Physica Status Solidi C*, v.1, 564, 2004.
26. **Don B, Kohary K, Tsitsishvili E, Kalt H, Baranovskii S, Thomas P. Quantitative interpretation of the phonon-assisted redistribution processes of excitons in In/sub 1-x/Cd/sub x/Se quantum islands.** *Physical Review B*, v.69, 45318, 2004.

27. **Tsitsishvili E, Lozano G, Gogolin A. Rashba coupling in quantum dots: An exact solution.**  
*Physical Review B*, v.70, 115316, 2004.
