

**List of scientific works Rachvelishvili Nana**

**P/N 35001056046**

1. 1. Thermodynamic assessment of the qualitative influence of the composition composition on the energy of the glass tempering process. National Academy of Sciences of Georgia Herald, Chemistry Series, Vol 35, #2, p. 193-196. **2009**. E. Matsaberidze, A. Sarukhani, A. Lomadze
2. Features of obtaining glass from compositions containing technogenic raw materials. The ma-salata collection of the 2nd International Conference of the Association of Ceramicists of Georgia, Tbilisi, **2009**. October 7-10, p. 97-102. E.L. Matsaberidze, A.V. Sarukhanishvili
3. Peculiarities of making glaze using man-made raw materials. Association of Saka-Rtvelo Ceramicists. 2nd International Conference and Exhibition. Tbilisi, October 7-10, p. 109-111. **2009** M. Kapanadze, M. Mshvildadze, A. Sarukhanishvili, A. Lomidze
4. Evaluation of Chiaturi ore beneficiation waste for use in glass materials production. common Three too. Practical Conf. Works "Innovative technologies and modern materials". Kutaisi, **2010**, June 17-18, p. 352-354. Kotrikadze D.
5. Rheology of enamel slips obtained on the basis of manganese-containing frits. of the world. science practice. Conf. Works ``Inovats". technologies and modern materials". Kutaisi, **2010**, June 17-18, p. 340-341. B.G. Gordeladze
6. The possibility of utilization of Chiaturi ore enrichment waste by glass-paint making technology. in the world Thirdly, practice. Conf. "Environmental protection and sustainable development", works, **2010**, p. 110-112. V. Gordeladze.
7. A number of peculiarities of Chiaturi manganese ore enrichment residues. common science Pract. Conf. "Environmental protection and sustainable development", Proceedings, Tbilisi, - 86-88 p., **2010**, d. Kotrikadze
8. To the issue of prediction of obtaining enamel frit from multi-mineral composition. Chemical Journal of Georgia, Volume 11, N2, pp. 164-169. **2011** V.G. Gordeladze, A.V. Sarukhanishvili
9. Using the method of an additive system of structural ingredients to calculate standard molar values of thermodynamic parameters of a number of borates. Chemical Journal of Georgia, Volume 11, N3, p. 308-311. **2011**

10. On the possibility of spectrometric evaluation of the processes during heat treatment of multimineral composition. Chemical journal of Georgia, volume 11, N4, p. 408-411. **2011**, V.G. Gordeladze, A.V. SaRukhanishvili
  
11. PHYSICAL-CHEMICAL PROCESSING IN THE FRIT TECHNOGENIC RAW MATERIAL CONTAINING COMPOSITE. Republic Conference of Young Scientists "Chemistry Today", 26th February, 29-30 **2011**
  
12. The possibility of using man-made materials in the production of enamels and glazes on the example of Chiaturi ore enrichment residues. common science Conf. "Woman and XXI Century", works, Tbilisi, June 30-July 1, p. 86-88 of **2011** d. Kotrikadze
  
13. On the possibility of calculating a number of borates. Academician T. Dedicated to Loladze's memory. Three too. Conf. "Inova too. Technologist. and materials", p. 24-27 X **2011**, A.V. Sarukhanishvili, V.G. Gordeladze
  
14. Non-clay schlickers. Sakar. Chemical Journal N12(2), Tbilisi, p. 137-140, ISSN 1512-1686 **2012**. V. Gordeladze, E. Matsaberidze
  
15. The influence of manganese-free enamel composition on the rheological properties of clay-free schlicker. A. Tsereteli house University. Dedicated to the 80th anniversary. Scientific and practical conference. Proceedings "Innovative technologies and modern materials", Kutaisi, 2. June 6-7, p. 138-140, ISSN 378-9941-448-37-9 **2013**
  
16. Characteristics of enamel for steel obtained using technogenic raw materials. Georgian ceramics. cook "Keramika" magazine N2, Tbilisi, ISSN 1512-0325 **2013**
  
17. Thermodynamic modeling of aluminum behavior in solution. Chemical journal of Georgia, volume 14, N1, 94-96 gv. ISSN 1512-0686 **2014**. N. Berdzenishvili, M. Siradze
  
18. Calculation of the soap base drying process. Bulletin of the National Academy of Sciences of Georgia, Chemistry Series, t. 41 #1-2. gv. 65. ISSN-0132-6074. **2015**. M. Siradze, I. Goksadze.
  
19. Structure and properties of synthetic ester waxes. Bulletin of the National Academy of Sciences of Georgia, Chemistry Series, t. 41 #1-2. gv. 65. ISSN-0132-6074. **2015**. M. Siradze, I. Goksadze
  
20. About tensions created in multi-component enamel as a result of fusion with copper. Technical University of Georgia, Proceedings, **2015**. N3(497), p. 128-130. V. Gordeladze, A. Sharukhanishvili, M. Kapanadze, M. Mshvildadze

21. Kaolinized trachyr as a complex raw material in the composition of bone porcelain. Chemical Journal of Georgia, 2015, volume 15. N2, p. 118-121. ISSN-1512-0686. **2015**, G. Gaprindashvili, S. Sanadze
22. Parttion Eqvilibrium and optimisation of solvent extraction process. International Scientific practical conference: „current actuat scientific Issues of the Modernity” Georgia, 345-349 **2017**. I. Berdzenishvili, M. Siradze
23. Methodological cleaning of groundwater from the quarry waters of Madneuli polymetallic deposits from heavy metal sulfates with subsequent selective extraction of metals in their pure form. Sat. i know Bulletin of the National Academy, Chemistry Series Vol. 43, No. 3. 336-340 **2017**
24. Metod of calculation of initial parameters for thermodynamic evaluation of obtaining various using Chatura manganum are enrichment wasle. Ceramics and advanced technologies. vol 25. 1(49) **2023**. ISSN 1512-0325. N. Rachvelisvili, V. Gordeladze, T. Tsilosani
25. The process of leaching arsenic sulphide raw materials and on it Study of intensification of operating parameters. Chemistry achievements and perspective Webb Technical University **2023** ISBN 978.9941-28-970. T. Tsilosani, Z. Sabashvili, T. Tsertsvadze, T. Buchukuri, N. Rachvelishvili
